

CMC15

DC Motor controller with adjustable start and braking ramps and speed control by 0 ... 10 V signal for DC motors up to 240W

Type: CMC15/DC12-24V

The CMC15 is a control device for DC motors and permits operation in both rotating directions, i. e. the rotating direction can be reversed with the input signal. Alternatively two motors can be operated in the same rotating direction. The motor speed is set by a 0 – 10 V signal.
